WORK MORE SAFELY

The thickest rulebook and strictest technical regulations will only keep production processes and work conditions safe if your employees have been taught to follow the rules and guidelines. Our training portfolio rests on three pillars: First of all, general safety seminars familiarize learners with the basis of health and safety. Second, specialized classes prepare workers to handle specific topics and functions. Finally – and this is what makes Infraser serv Höchst truly special – we custom-developed advanced safety courses for your company's unique needs.

SAFETY AT WORK WITH KNOWLEDGE & RESPONSIBILITY

A company's quality partly reflects how safe its production processes and work conditions are. And not just because it's the law. There are plenty of ethical and economic reasons to make safety a top priority. Infracerv Höchst's total training package is designed to support your workers on their entire journey, from learning the ABCs of health and safety to niche training for executives or specialists.

NEEDS IDENTIFICATION AND EXECUTION

There are many different laws, rules and regulations governing health and safety training for employees. We will work closely with you to determine what training your staff needs, develop a training plan for you and provide the training with all requisite documentation.

TRAINING BASED ON ACCIDENT INSURERS' RULES

We link the training subjects together into combo courses that culminate in a two- to four-hour class, divided into different thematic blocks. No class should have more than 20 learners. It can be taught at your site or our facilities. You can register your employees for any of our public courses, too.

TRAINING FOR CERTAIN JOBS

Statutory accident insurance carriers require special training for people who operate forklifts, cranes, power washers or have other special functions. We can provide these courses publicly or internally at your site.

HEALTH & SAFETY TRAINING ON SPECIFIC COMPANY TOPICS

Current regulations do not define or imply training requirements for every activity. However, managers, safety compliance officers and employees with special duties still need to be prepared for the specific safety challenges they face in their areas of responsibility: safe machine use, fire and explosion hazards in the current premises, etc. Our seasoned experts are engineers, chemists, master craftspeople and psychologists in an array of disciplines. After conducting a careful analysis, they will work closely with you to develop training programs precisely tailored to what your company and employees need.

HEALTH AND SAFETY TOPICS FOR TRAINING

- >> COMPANY ENVIRONMENTAL REPRESENTATIVE (IPH)
- >> AUTHORIZED PERSONS FOR DANGEROUS GOODS
- >> ELECTRICAL SAFETY
- >> EXPLOSION SAFETY
- >> MANAGEMENT TRAINING
- >> HAZARDOUS SUBSTANCES
- >> MACHINERY SAFETY
- >> MOTIVATION AND BEHAVIOR
- >> PRODUCTION AND OPERATIONS
- >> SCC
- >> OCCUPATIONAL SAFETY

OUR SERVICE PORTFOLIO IN DETAIL

- Providing safety training based on existing training programs and designing new training programs tailored to your requirements
- Hands-on training on various pieces of equipment (forklift, crane, scissor lift, pressure washer, etc.), confirmed by a DGUV certificate of competence that is issued in the technical training center
- Training for confined space atmospheric testing per DGUV Rule 113-004
- Training for competent/authorized persons (for ladders, scaffolds, electrically instructed persons, safety compliance officers, etc.)
- Training on explosion safety
- Training for executives such as prospective plant managers
- E-learning modules on occupational safety
- E-learning modules on occupational health
- E-learning modules on other issues such as equal treatment, data protection, information security

TOTAL TRAINING PACKAGE

This all-in-one program was developed for companies who want once and for all to entrust all their health and safety training to a highly capable provider. We will meet all your training needs with a master contract. Our services are:

- Assessing need and preparing the training plan
- Entering learners' data
- Issuing invitations and rescheduling classes in consultation with someone at your organization
- Reviewing the training plan with you twice a year
- Documenting the training certificates for each learner

Prices are calculated per learner and year.

YOUR BENEFITS:

- Focus on your core business
- Improve employee qualifications and motivation
- Obtain sound advice from an experienced practitioner
- Raise your productivity with improved safety
- Obtain legally robust evidence of your regulatory compliance
- E-learning programs round out our portfolio and minimize the disruption to your business processes
